

Let's Make a Buzz saw

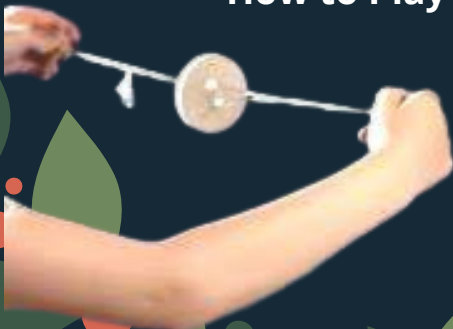

aka Whirlygig

Materials

- 4-6 Feet of string (twice the length of the person's arm) yarn, or thin ribbon
- 1 large button or another round, button-shaped object
- 1 Pair of scissors

- ## How to Make
- Cut a length of string approximately twice the length of the person's arm.
 - Thread the string through one hole in the button and then through the hole directly across. If it is a 4 hole button thread through the diagonal hole.
 - Tie both ends of the string together into a knot.
 - Center the button on the string

How to Play

Hold one end of the loop in each hand. Then swing the whirlygig around in a circular motion to wind the string. Have your finger inside the end loops to create little handles with your fingers. As you pull your hands in and out, the button will spin to unwind and then rewind the string.
