# SIMPLE MACHINE SCAVENGER HUNT

## HOW TO PLAY

Go around your house and property and find examples of each simple machine. Draw a picture of it or write about it in the space provided. Write what it is and where you found it. Also what is it used for in your home.

The form consists of seven rectangular boxes arranged in a grid-like pattern. Each box is connected to a blue tab with a white border that contains the name of a simple machine. The boxes are intended for drawing or writing about the machine found in the home.

- Pulley**: Located at the top left.
- Wedge**: Located on the left side, below Pulley.
- Lever**: Located at the top right.
- Wheel and Axle**: Located in the middle right area.
- Screw**: Located at the bottom left.
- Inclined Plane**: Located at the bottom middle.
- Complex Machine**: Located at the bottom right.

In the last box it says complex machine. What could you find that was a combination of more than 1 simple machine?
